PROFESSIONAL SUMMARY

Results-oriented Data Analyst with practical experience in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to produce actionable business insights. Experienced in building dashboards, performing exploratory data analysis, and communicating findings through clear reports. Strong problem-solving and analytical skills with hands-on internship and project experience.

CORE SKILLS

• SQL • Python • Power BI • Excel • Data Cleaning • Exploratory Data Analysis • Dashboard Development • Data Visualization • Git & GitHub • Microsoft SQL Server

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Codveda Technologies, India | May 2026 – June 2026

- Performed customer churn analysis using Python and Pandas.
- Cleaned and transformed data for analysis.
- Built visualizations with Matplotlib and Seaborn.
- Developed a Random Forest model and exported results to Power BI.
- Documented the project on GitHub.

SQL Data Analyst Intern | Codveda Technologies, India | May 2026 – June 2026

- Designed a relational database in SQL Server.
- Wrote advanced SQL queries using JOINS, CTEs, GROUP BY and HAVING.
- Improved data quality and documented the solution.

Data Analyst | Independent Projects | Sep 2025– Present

- Built interactive Power BI and Excel dashboards.
- Analyzed sales, marketing and real estate datasets.
- Delivered insights to support business decisions.

PROJECTS

Customer Churn Prediction (Python | Scikit-learn | Power BI)

- Analyzed telecom customer data to identify factors influencing churn.
- Cleaned and transformed data using Pandas, handled missing values, encoded categorical variables, and standardized numerical features.

- Performed exploratory data analysis (EDA) using Matplotlib and Seaborn.
- Built and evaluated a Random Forest model to predict customer churn.
- Exported predictions to CSV and created a Power BI dashboard.
- Documented the project on GitHub.

Sales Performance Dashboard (Excel | Power BI)

- Cleaned and transformed sales data.
- Created KPIs including revenue, profit, monthly sales, and top-performing products.
- Built interactive Power BI dashboards with slicers and charts.
- Identified sales trends and provided recommendations.

Marketing Campaign Performance Analysis (Excel | Power BI)

- Analyzed campaign performance across multiple channels.
- Measured conversion rate, engagement, and ROI.
- Built dashboards to compare campaign performance.
- Recommended optimization opportunities.

Real Estate Data Analysis (Excel | Power BI)

- Analyzed property data to identify pricing trends.
- Compared locations based on demand and investment potential.
- Created dashboards to communicate insights.

SQL Project Documentation Database (SQL Server)

- Designed a five-table relational database.
- Created tables with PK/FK constraints.
- Wrote advanced SQL queries using JOINS, CTEs, GROUP BY, HAVING, and aggregates.
- Improved data quality and documented the solution on GitHub.

EDUCATION

Higher National Diploma (HND)

Federal Polytechnic, Oko (2018–2022)
